## **DISCLAIMER**

**Last Updated:** July 28, 2026

### **Not Financial Advice**

Trade Qube provides automated, informational analytics about publicly traded equity options along with estimated entry prices, expirations, probabilities of success, and potential profitability (collectively, “Outputs”).

All Outputs are purely algorithmic results derived from historical and market data. They are not financial, investment, legal, tax, or accounting advice, and are not a recommendation, offer, or solicitation to buy, sell, or hold any security. Outputs are impersonal and general in nature. They are not tailored to you and do not account for your financial situation, objectives, risk tolerance, or holdings.

### **No Advisory Relationship**

Trade Qube is not a registered investment adviser or broker-dealer and is not registered with the SEC, FINRA, the California Department of Financial Protection and Innovation, or any other regulatory authority. Using the Service creates no advisory, fiduciary, or brokerage relationship between you and Trade Qube.

### **No Guarantee**

We do not guarantee the accuracy, completeness, timeliness, reliability, or profitability of any Output. Outputs may be delayed, incomplete, or wrong, and depend on third-party data we do not control. Nothing here is a promise that any signal, probability estimate, or strategy will be profitable or perform as modeled.

### **Hypothetical and Historical Results**

Certain Outputs, including probability of success and potential profitability estimates, are hypothetical or based on historical data and back-testing. Hypothetical and back-tested results have inherent limitations: they are calculated with the benefit of hindsight, do not represent actual trading, and do not account for slippage, fees, liquidity, or real-market execution. Past performance does not guarantee or indicate future results. No representation is made that any account will or is likely to achieve results similar to those shown.

### **Trading Risk**

Options trading involves substantial risk and is not suitable for every investor. You can lose some or all of your investment, and certain strategies expose you to unlimited loss.

**Your Responsibility**

You are solely responsible for your own trading and investment decisions and for any resulting gains or losses. You should do your own research and consult a licensed financial adviser, broker, or tax professional before acting. To the fullest extent permitted by law, Trade Qube is not responsible or liable for any trading losses, gains, or decisions made on the basis of any Output.

**Limitation of Liability**

This Disclaimer is part of and subject to the Trade Qube Terms of Service, including the disclaimers of warranties, limitation of liability, and dispute-resolution provisions in those Terms, which are incorporated here by reference. In case of conflict, the Terms of Service control.
